<b>Special hazards arising from the substance or mixture</b>	Hazardous decomposition: Thermal degradation at high temperatures above 575° C (1067° F) may produce sulfur trioxide.
<b>Advice for fire-fighters</b>	Wear positive pressure, self-contained breathing apparatus and goggles. Contain any liquid runoff. Unusual Fire and Explosion Hazards: None known

## SECTION 6: ACCIDENTAL RELEASE MEASURES

<b>Personal precautions, protective equipment and emergency procedures</b>	Put on appropriate personal protective equipment (see section 8). Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.

<b>Skin Protection:</b>	Impervious gloves and clothes.
<b>Respiratory Protection:</b>	If workers are exposed to concentrations above the exposure limit they must use the appropriate, certified respirators.
<b>Engineering Controls:</b>	Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and any vapor below occupational exposure limits suitable respiratory protection must be worn.
<b>Other Work Practices:</b>	Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.
